

# funtronic floor

**The Funtronic (EDU) Floor** is an innovative interactive device (floor or table). It is a teaching aid designed for preschool and school children. Enhancing the learning and physical development of children. Turn an ordinary floor or table into a multimedia area, delivering amazing adventures to the youngest.

**The combination of the new technologies with the standard teaching model constitutes The Funtronic Method which:**

- 👁️ supports children in achieving better learning outcomes,
- 👁️ focuses their attention on educational contents,
- 👁️ uses motion,
- 👁️ stimulates the senses of sight and hearing

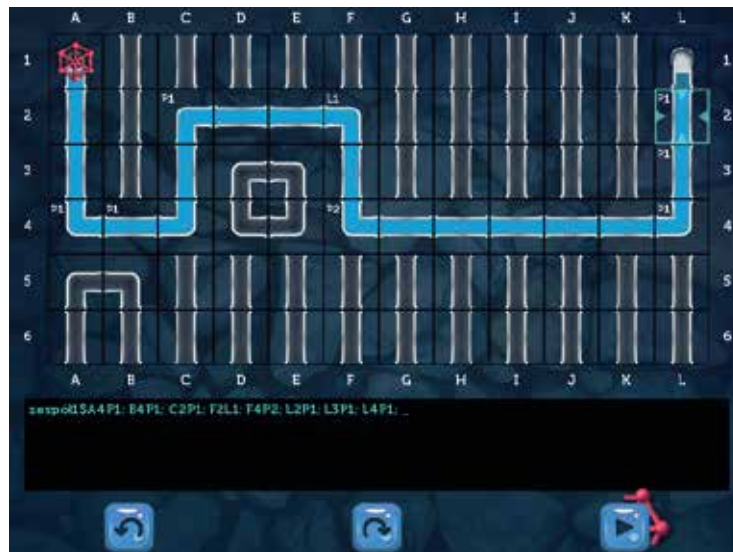

**User-friendly - one remote control and hand and foot movements.**

## NEW OFFER

**FUNCODING** game package for learning computer programming at 3 different levels - for kindergarten, primary schools, (grades 1-3) and grades 4-8. Develops child logical, analytical and computational thinking skills

**All the games of The Funtronic Floor have been designed by the best experts in their fields:**

**ANDRZEJ PEĆ** – pedagogist, Superbelfer RP (“Super Teach of the Republic of Poland”) and educator at the European Training Center. Together with his team he has created quizzes and games in the (FUNCODING) package.

**KATARZYNA MULIŃSKA** – pedagogist, graduate of English Studies. She has developed the substantive contents of the games in the English learning package.
