

The Funtronic REH Funtronic Floor is an innovative interactive device (floor or table). It includes exercises, games and physical activities intended for the rehabilitation of children. It is a rehabilitation aid aimed at improving concentration, hand-eye coordination and encouraging participation. Turn an ordinary floor or table in to a multimedia arena, incorporating amazing adventures into rehabilitation at the same time

Funtronic Floor is dedicated to children with disabilities such as:

- 💡 autism,
- 💡 cerebral palsy,
- 💡 mental impairment,
- 💡 ADHD,
- 💡 concentration and attention deficit disorder,
- 💡 cognitive development disorder.

User-friendly – one remote control and hands and feet

Rehabilitation games of The Funtronic Floor have been developed by the best experts in their fields:

- 💡 A package of games for the rehabilitation of children with development delays was prepared in cooperation with the Rehabilitation, Education and Pedagogical Center in Ledziny
- 💡 A package of games for stimulating the development of pedagogical functions was prepared in cooperation with the Laboratory of Diagnostic Tests and Therapeutic Aids as well as "The Sun Ray" Foundation ("Promyk Stońca") from Wrocław.
